# NAVAIR SNT Definition

Serial Number Tracking, enabled by automatic identification technology (AIT), provides closed loop, cradle to grave status information on maintenance critical, serialized parts.

## AIT Implementation

Components  
Media Selection  
Location

*Inaccurate, unused  
untimely data*

*Proactive use of  
real time, accurate data*

# Implementation Process

**Program**

## **Non Recurring Engineering**

Identify components to be tracked

Select AIT media

Determine information required on the media

Document with ECP

Formulate installation and support plans

## **Implementation**

Purchase hardware/kits

Authorize install -

Technical directive

Authorize flight -

flight clearance

Labor to install

# Implementation Plan

 Non recur Eng.  
 Retrofit

**\*\* Not included: UAV's, missiles, engines or common support equipment \*\***

**Engine Specific**

# Non Recurring Engineering Considerations

## Real Estate

location,  
readability  
when installed

## Non Recurring Engineering

- + Identify components to be tracked
- + Select AIT media
- + Determine information required on the media
- + Document with ECP
- + Formulate installation and support plans

## Data

Cage, Part Number  
Serial Number  
Logset

## Environment

Temperature, solvents  
wear, vibration

## Cost

Media  
tradeoff

**DOCUMENTATION**

# Information System Concept

***Plan: Collect data through interfaces with various supply and maintenance systems and provide access via a Virtual Shared Data Warehouse***

## ***Three components:***

### ⇒ Data Collection

- ✓ Enabled by AIT: Data accuracy improvement, time savings
- ✓ AIT Interface required
- ✓ Dual AIT capable: Contact Memory Buttons and Bar Codes

### ⇒ Data Storage

- ✓ Various maintenance/supply database changes required

### ⇒ Data Retrieval

- ✓ Single Portal: Virtual Shared Data Warehouse (VSDW)
- ✓ Web-enabled: [www.snt.navy.mil](http://www.snt.navy.mil) (Access controlled: PKI)
- ✓ Ad-hoc query/report generation capabilities

# Serial Number Tracking (SNT) Implementation

## AIT Media Installation Strategy

## Installation Options

### A. Forward Fit

- (1) New Delivery Aircraft
- (2) New Delivery Spares

- ✓ Class II ECP
- ✓ Install during production
- ✓ Revise parts marking standard (MIL-STD-130)
- ✓ Funded from existing APN accounts

### B. Retrofit

- (1) Installed (*Aircraft*)
- (2) Non-RFI Spares
  - (a) Retail
  - (b) Wholesale
- (3) RFI Spares
  - (a) Retail
  - (b) Wholesale
- (4) Installed (*Others*)
  - (a) Trainers/Training Equip
  - (b) Test Bench Installs (TBIs)
  - (c) Maint Assist Modules (MAMs)

- ✓ Technical Directive (TD)
- ✓ Install based upon accessibility to item
  - ↳ "O" Lvl - B (1)
  - ↳ "T" Lvl - B (2)(a), B(3)(a), B(4)(b)(c)
  - ↳ "D" Lvl - B(1), B(2)(b)
  - ↳ NAVSUP - B(3)(b)
  - ↳ NAMTRAGRU - B(4)(a)
- ✓ TD Preparation - PRL or Alternate Fund Sources
- ✓ TD Kit(s) - \$?

# Information Systems Changes

Web Enabled  
SNT  
Front End

Funded IOC  
(Oct 00)

## Activation of SNT System

- DSS
- Access via databases (Green)
- Basic queries to support AMSR issue 16

Retail Sector	AIT Interface	Database Changes	Database Access	System Development
NALCOMIS Aviation O/I	CMB/ Bar Code	N/A	Mar 00	N/A

Wholesale Sector	AIT Interface	Database Changes	Database Access	System Development
MRP II Organic Depot	CMB/ Bar Code	N/A	TBD Aug/Sep 00	N/A
FACTS Carcass Shipment	Bar Code (on Pkg)	N/A	Mar 00	Minor Changes
ATAC Retrograde Tracking	Bar Code (on Pkg)	N/A	Mar 00	SN Feed to Database
CAV Commercial Depot	CMB/ Bar Code	Add SN	Mar 00	Warranty Tracking
GTN Global Transportation	Bar Code (on Pkg)	N/A	TBD Jul/Aug 00	N/A
U2/UICP/DSS Wholesale Inventory	Bar Code	Add SN	Expect Strategy June 00	
? Interservice Depots	CMB/ Bar Code	Add SN	TBD	TBD

## Legend

- = Capability exists or funded
- = Req't known/known delay
- = Unknown cost/schedule

**Interim Solution:**  
Force Inventory  
Assets in SNT  
Suspense File

**Engine Specific**

# What is Happening Commercially

- **Airbus Industrie:**
  - **Must be ATA SPEC 2000 Compliant-LRU parts**
    - General Conditions of Purchase (GCP 2000 - Issue 4)
    - Airbus Industrie Directive (ABD100.2.9)
- **Boeing will have similar requirements**
- **United Airlines requesting implementation plan for machine readable, unique identification of all serialized engine parts**

# Current Equipment

# Matrix Examples

*Machine Readable*

*Human Readable*

**18 x 18 Square  
Data Matrix**

P/N 1B2456 C

**Fast, Accurate  
Part  
Identification**

**INCREASED RELIABILITY**

**Data Availability  
Wherever  
Needed**

**STRATEGIC  
VISION**

**Standardized  
Identification  
Method**

**Data Sharing  
Across Industry  
Supplier, Eng. Mfg.,  
O/R Shops, Airlines**

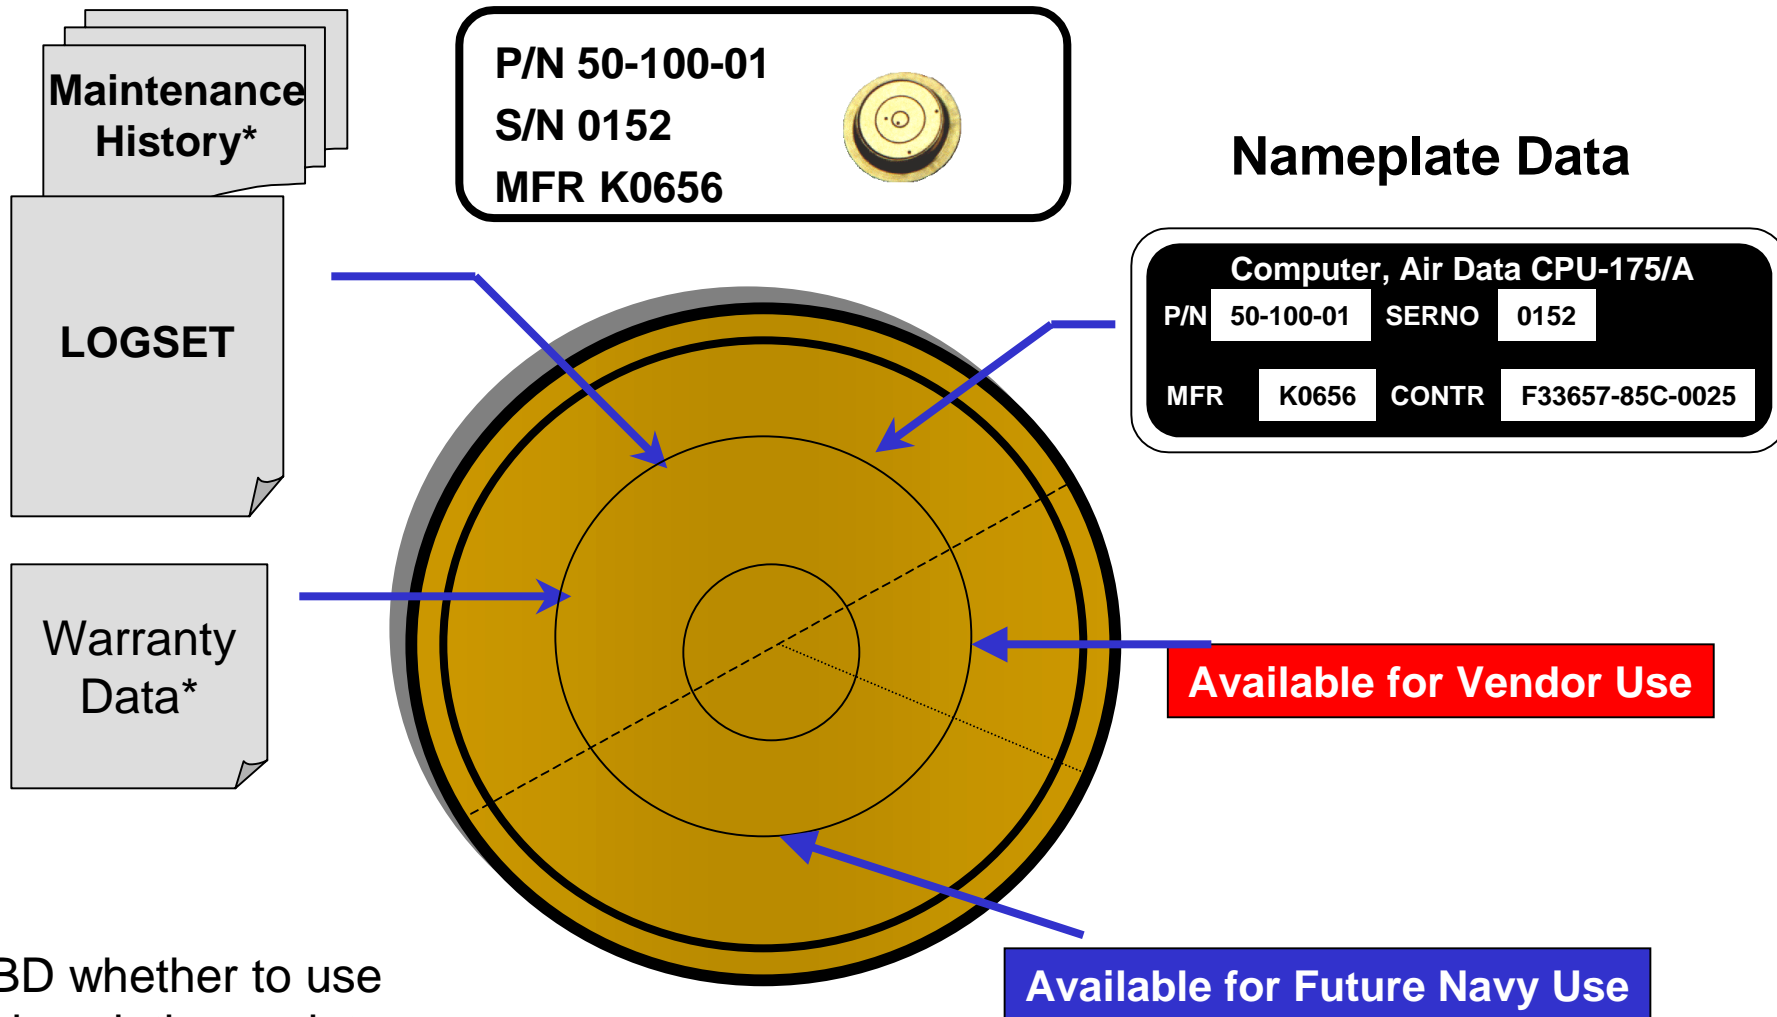

**Data Based Problem  
Resolution/Investigation**

**Background/Support**

# Contact Memory Button Partitioning

|

\* TBD whether to use  
within aviation maintenance

# “7” Mandatory Data Elements

Data Element	Mandatory	Conditional	Comments
A. Nomenclature	X		Need a noun name for the manufacturer
B. Customer Part Number		X	
C. National Stock Number (NSN)		X	NSN rather than NIIN because NIIN can change
D. Supplier Part Number	X		Known from the beginning
E. Supplier Serial Number	X		Original Equipment Manufacturer (OEM) if appropriate
F. Lot Number	X		
G. Special Material Identification Code (SMIC)		X	
H. Date of Manufacture (DOM)	X		Birth Date
I. Commercial & Government Entity (CAGE) Code	X		Needed for the supplier
J. Data Universal Numbering System (DUNS) Number		X	Mostly used for medical
K. Demilitarization Code		X	
L. Joint Army Navy (JAN) Number			Not required for either mandatory or conditional category
M. Contract Number		X	
N. DD Form 250 Number		X	
O. Warranty Start Date		X	Consistent with Serial Number Tracking (SNT)
P. Warranty Stop Date		X	Consistent with Serial Number Tracking (SNT)
Q. Model Number	X		To establish uniqueness
R. HAZMAT Code		X	Where appropriate
S. Shelf Life		X	Where appropriate
T. DoD Identification Code (DODIC)		X	

# ***AIT Equipment***

## **MiniButton™**

(Note: Not Shown to Scale)

MacSema, Inc. Part #BMEWK8  
Cage Code **03BF3**

### Dimensions:

Flange Dia. = 14.3 mm  
Flange Thick. = 0.2 mm  
Button Dia. = 10.7 mm  
Button Height = 3 mm
